

Transport for the North Treasury Management Strategy

1. Executive Summary:

- 1.1 Under law, Transport for the North (TfN) is required to adopt an annual Treasury Management Strategy (TMS). The parameters within which this strategy is developed are informed by operational practicalities and statutory obligations.
- 1.2 Whilst the concept of a TMS that governs approaches to investments and debt management will be familiar to northern partners, the circumstances of TfN's operating environment may not be.
- 1.3 TfN cannot access external credit, whether this be in the form of bank overdrafts to manage short-term cash-flow fluctuations or capital loans to support long-term investment aspirations.
- 1.4 This removes TfN's need for a policy towards debt-management, but does shape the requirements of a cash-management (investment) strategy. Such a strategy is further informed by the way in which TfN is funded.
- 1.5 Without access to revenue-raising powers, TfN is reliant upon grant received from the DfT to resource its activity. This grant comes in the form of an annual 'core' grant over which TfN has discretion, and discrete grants for programme and development activity. The latter grants require pre-approval from the Department and are paid to TfN as required.
- 1.6 Accordingly, TfN's operating environment exposes it to insolvency risk which cannot be mitigated through the normal options open to a local or combined authority: cash-flow loans, and the effective underwrite which access to a local tax-base provides.
- 1.7 Instead, TfN must mitigate its risk by managing its cash-flows in a particularly prudent manner. This factor promotes the dovetailing of a managed risk-culture within TfN, with a prudent reserve strategy, and an effective approach to cash-management. These strategies would be underpinned by the basic operating assertion that TfN must always have access to an appropriate balance of accessible cash on any given day to guard against financial-shock.
- 1.8 A managed risk culture involves TfN working collaboratively with other organisations (including DfT, northern partners, national agencies and suppliers) to structure contracts and financial relationships to ensure that its exposure to financial risk is proportionate to its ability to manage that risk.
- 1.9 A reserve strategy is proposed as part of TfN's budget that would support risk mitigation by, at any point in time, holding no less than £2m of cash in reserve. Such cash would be held on deposit in an appropriate bank or other financial institution, serving as a cash-buffer against financial-shock.
- 1.10 Finally, a cash management strategy must deliver upon the most basic requirement: that TfN will always have comfort that cash held on

deposit is invested with only the most secure of counterparties, and is accessible in a timely manner.

- 1.11 This approach aligns with the priorities common to public-sector bodies that cash investment decisions must be made with due-regard to the following hierarchy of considerations:

- a) Security of the investment partner (creditworthiness);
- b) Liquidity of the investment (accessibility);
- c) Yield of the investment (financial return).

2. Annual Investment Strategy:

- 2.1 CIPFA defines treasury management as:

“The management of the local authority’s investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks.”

- 2.2 The extent of TfN’s treasury management activity will be limited to its cash management. This covers its banking arrangements, and its policies towards the safeguarding of its cash balances.

- 2.3 TfN will report on its cash management strategy throughout the year. This will come in the form of a Treasury Management Strategy document which is proposed for adoption on an annual basis; a mid-year review of performance against this strategy; and, an annual Treasury Management Report at the end of the year which highlights overall performance and offers lessons learnt.

- 2.4 Noting the serious risks around cash-management, and relatively recent high-profile failures within public-sector investment strategies, TfN is required to adequately resource this activity through the provision of internal capacity supplemented by expert and independent third-party support.

- 2.5 Consistent with the approach adopted by northern partners, TfN will procure a Treasury Advisor to gain access to expert technical resource and capacity. The Treasury Advisor will assist TfN in maintaining market intelligence, and ensuring that the cash-management strategy remains appropriate throughout the year.

- 2.6 TfN recognises, however, that it cannot place undue reliance on external support, and must maintain internal skills and capacity.

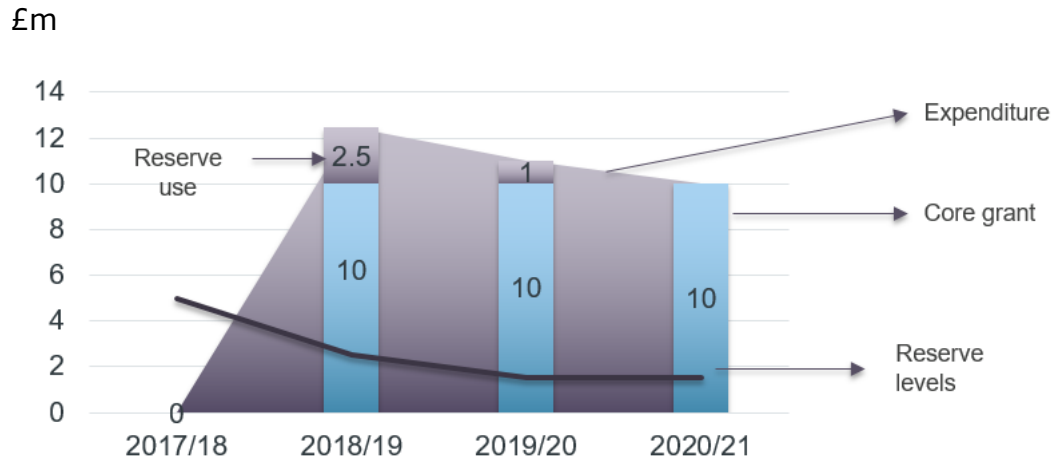

- 2.7 Treasury Management activity will fall under the operating purview of the Finance Director and the Financial Controller. The current TfN Financial Controller holds a Certificate in International Treasury Management (Public Sector) awarded from the Association of Corporate Treasurers, which helps TfN to discharge this obligation.

- 2.8 Finance officers and those members charged with oversight of TfN's affairs will also be offered both internal and external training where appropriate.

3. Core Funds & Expected Investment Balances:

- 3.1 TfN receives its funding from the Department for Transport (DfT) in the form of grant allocations. This grant can be differentiated between discreet funding for pre-approved programme activity, and general 'core' grant over which TfN has discretion – subject to the parameters set by TfN's objectives and TfN-DfT funding agreements.
- 3.2 How TfN is funded shapes the level of cash balances to be held. There are two principal factors:
- a) Discreet funding is awarded on a 'need' basis, generally meaning that DfT will release cash to TfN in advance of need; and TfN requires cash in hand at sufficient levels to guard against financial shock, noting its inability to access overdrafts, or raise revenues from a local tax base.
 - b) Being funded on a 'need' basis means that the programmes operate on a cash-neutral basis. That is, the cash outflows associated with payments will always be met by the cash inflows associated with the grant received.
- 3.3 To that end (and subject to TfN receiving appropriate assurances from DfT prior to entering into long term financial commitments), the cash flow implications of receiving grant in this manner is simply associated with the timing differences between receiving grant and spending it. As programme grant is awarded quarterly, this will generally mean that those variances will be corrected within three months.
- 3.4 Similarly, being funded on a need basis means that TfN will not build up cash balances when its activity associated with core grant underspends. When such underspends do occur, they will be treated in the context of the proposed reserve strategy.
- 3.5 TfN's reserve strategy ensures that over a three-year period cash balances held in reserve will not fall below £2m. However, cash balances may be higher than this in any given year if there is an agreed plan to draw down upon that cash to support the business plan.
- 3.6 This reserve strategy affords TfN a degree of flexibility in that it can use cash balances over its minimum threshold (£2m) to support expenditure plans that are higher than the in-year available resource. That is, TfN can supplement its annual grant from draws on available reserves where it is prudent to do so.
- 3.7 The reserve strategy also allows the DfT to fund TfN in an efficient manner. Working to a target reserve cash balance means that DfT does not unnecessarily draw down on funds from HM Treasury before they are required by TfN.

- 3.8 Although cash balances will likely fluctuate in-year as timing differences arise between cash being received and payments being made, it is expected that TfN's underlying cash position will reflect its reserve strategy profile. This profile sees core cash balances of c. £5.5m being draw upon in 2018/19 and 2019/20, before stabilising at the reserve threshold of £2m by 2020/21:

4. Investment Policy:

- 4.1 The intention of the investment strategy is to provide security of investment and minimisation of risk. This ensures TfN will not chase yield at the expense of the security of investments, and not prejudice TfN's risk mitigation priorities. The strategy also enables TfN to operate a diversified investment portfolio to avoid an over concentration of risk.
- 4.2 TfN's investment policy has regard to the government's Guidance on Local Government Investments ("the Guidance") and the 2011 revised CIPFA Treasury Management in Public Services Code of Practice and Cross Sectoral Guidance Notes ("the CIPFA TM Code").
- 4.3 In accordance with the above guidance from DCLG and CIPFA, and in order to minimise the risk to investments, TfN will only invest with the most creditworthy of counterparties, and for durations that reflect TfN's need for timely access to its cash. TfN will also limit its overall exposure to individual institutions by adopting limits to the amount of cash it will place with any one bank or fund.
- 4.4 TfN will develop a more sophisticated approach to determining investment counterparties with its Treasury Advisors, but until their appointment it will operate to the following basic parameters.
- 4.5 [Length of Investments](#)

TfN will favour short-term liquid investments which give it ready access to its cash:

- a) Individual investments will not be placed for longer-than 3 months

- b) At any point, at least £1m will be held in same-day access funds or accounts.

4.6 Counterparty Credit Ratings

TfN will invest in only the most secure institutions and public bodies:

- a) TfN will only deposit cash in investment grade institutions with a credit-rating of at least 'A' from Fitch Ratings (Moody's 'A2'/S&P 'A'); and
- b) TfN will invest with local authorities and the Debt Management Account Deposit Facility (DMADF) arm of HM Treasury as if they hold the UK sovereign rating.

4.7 Country Sovereign Ratings

Recognising the support that individual nations and central banks offer to banking institutions, TfN will:

- a) Invest with counterparties from countries with a minimum sovereign credit rating of 'AA-' from Fitch.

4.8 Investment Classes

TfN will limit investments to the following Sterling denominated classes:

- a) Term deposits with financial institutions and public bodies;
- b) Redeemable share purchases in same-day access AAA rated constant net-asset value money market fund.

4.9 Investment Values

TfN will limit its exposure to individual institutions by:

- a) Investing no more than £5m in individual institutions and funds;
- b) The sole caveats to this are necessary investments with TfN's own bank and investments with the DMADF.

5. **TfN's Own Bank:**

- 5.1 TfN will seek to appoint a banking provider that meets its minimum credit-rating, but notes that this rating may change into the future.

- 5.2 TfN also recognises that from time-to-time cash may be received into its own bank after electronic banking cut-offs. In such circumstances TfN will be obliged to hold cash with the bank at a level and for a length of time that it would otherwise choose not to.

- 5.3
 - a) TfN will appoint a bank with a current rating of at least a Fitch long-term rating 'A' (or other rating agency equivalent);
 - b) Where possible, TfN will apply the same investment parameters to its own bank as it would any other UK bank;

- c) Recognising banking transfer restrictions, where necessary TfN will deposit all funds with its own bank;
- d) Where TfN's own bank falls below its minimum credit rating, cash balances will be kept to a minimum required for operational efficiency;
- e) Where TfN's own bank falls below its minimum credit rating, cash balances of more than £0.1m will be held with the bank for not longer than 3 days.

5.4

Investment Class	Minimum Credit Rating*	Max Investment Value	Max Investment Length
UK Local Authority	UK Sovereign	£5m per body	3 months
UK Debt Management Office	UK Sovereign	Unlimited	3 day
UK Bank	A	£5m per body	3 months
Money Market Fund	AAA	£5m per fund	1 day
TfN's own bank†	A	Unlimited	3 months

* credit ratings are based upon Fitch's Issuer Default Rating to give a view on the relative security of counterparties. The 'A' rating represents an investment-grade organisation described as 'high-credit quality'.

† to be appointed.

5.5

Investment Expectations

The Bank of England base-rate is expected to rise slowly from its historic lows in the coming years as low-growth and low-inflation weigh upon markets. In turn, investment rates are expected to remain subdued.

5.6

TfN expects to earn immaterial returns from its cash investments, and will not sacrifice its need for security and liquidity in the pursuit of yield. Forecasts for coming years suggest the following investment returns:

	2018/19	2019/20	2020/21
Investment Returns	0.25%	0.25%	0.50%
Cash on Deposit (in year average)	£4.25m	£2.5m	£2m
Investment Return	£0.01m	£0.01m	£0.01m
